GCSE 8 - 9AQAEDEXCELOCRWJECAQA November 2022 Highest level 8-9 GCSE Example: Solve inequality $x^2 \leq 64$ When solving quadratic inequalities, it is important to remember that there are two cases. If the question was to solve $x^2 = a^2$, take the square root of both sides so that $x = \pm a$. The range of values that satisfy inequality is between -8 and 8. ³ This can be expressed as, $-8 \leq x \leq 8$ level 8-9 GCSE Resolves inequality $2x^2 \leq 18$ Here we have to divide both sides of the equation by 2 so that $x^2 \leq 9$ values that satisfy this inequality are $x \leq -3$ or $x \leq 3$ level 8-9 GCSE Level 8-9 GCSE Resolves inequality $x^2 - 2x - 3 \geq 0$ $3p^2 \geq 12$ $p^2 \geq 4$ end {aligned} therefore, p It can take any value greater than 2, $p >$ or less than -2, $p <$ 0, so that The question is: When is the graphic above zero? We can see that it is above zero when p is less than -2 and also when p is above 2. Therefore, the solution is, $p < -2$ or $p > 2$ We solve this inequality for simply reorganizing it to make the subject, $x^2 - 3x + 2 <$
